Product Applications

Decking • Fencing • Sill Plates • Framing Lumber • Studs • Floor Joists
Log Siding • Logs • Roof Rafters • Trusses • Roofing • Plywood • Sheathing
Playgrounds • Pre-Fab Wall Systems • Moldings • Furring Strips • Flooring • Wood Trim

Product Features

- Lumber is pressure treated with DOT Borates (Disodium Octaborate Tetrahydrate), a natural preservative & **EnviroSafe Plus®**, a colorless, water-repellant polymer system.
- Approved for Above Ground, Exterior Applications by the International Code Council (ESR-1081) and accepted by the Environmental Protection Agency (79628-1).
- Virtually Non-Corrosive – Standard Galvanized Fasteners can be used.
- Fire Retardant Properties.
- Low Toxicity – low risk to humans & other non-target animals.
- Odorless & Non-Volatile – no negative effects on indoor air quality.
- Resists attacks by Subterranean Termites, Dampwood Termites, Drywood Termites, Powder Post Beetles, Carpenter Ants, other Wood-Destroying Insects & Decay Fungi.
- Wood retains natural color characteristics after pressure treatment allowing for a natural wood look or for stain to be applied.
- Minimum wear on tools.
- No adverse effects on strength or elasticity of lumber.
- 40 Year Transferable Limited Warranty.
